

1 Inputs

Task Instruction
"I need a bottle of Cola, Mirinda and Milk in the Basket."

+

Scene

Capability Sets $o(t)$
Visual Observation $\{C_i\}$

2

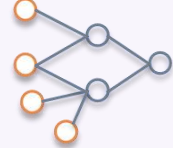

SEMANTIC LAYER

Command Dispatch

Franka_left PICK milk
 Suction_left PICK cola
 ⋮
 Franka_right GO_TO pos_1

Shared Semantic State

S_V^{sem}

authoritative · versioned

Affordance Role

- Objects in which region?
- Reachable by which arm?
- Any obstruction?
- Any scene changed?

Planning Role

- Subtask decomposition
- Capability assignment
- Skill match
- Construct dependency

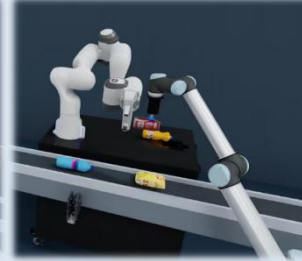

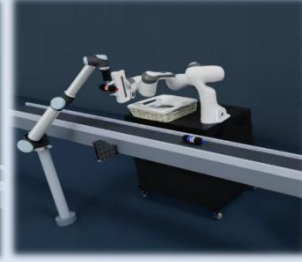

Verification Role

- Execution abstract
- Subtask succeeded?
- Any events occurred?
- Which subtask affected?

3

PHYSICAL LAYER

Execution Evidence

Event

- task update
- disturbance
- failure

Event Occurs

"No, use a can of Cola instead of Mirinda."

→ online execution flow
 - - - semantic event re-entry
